Critical Apple Update for all Devices (iPad, iPhones, MacBooks and iMacs

2021-07-27 - Don Guilbeault - Comments (0) - General

Please be advised Apple has released a critical updated to all iPads, iPhones and Mac OS 11.5+ devices to correct a security flaw found in the operating systems.

Please ensure your devices are up to date.

iPhone and iPads

Go to settings – General – Software Update – Then install any updates available.

MacBook Users

Click on the Apple logo top left corner – then on “About this Mac” – Then click software update.

Keep running the above steps to ensure all updates are installed. If you have any difficulties, you can pop by the admin office and I would be more than happy to assist.

Thank you all for working to keep our data secure.

Regards.
