EMAIL Scams REMINDER

2020-06-16 - Don Guilbeault - Comments (0) - General

Hello all,

Please note there are a number of various SPAM / PHISHING emails going around to either claim you have a voice mail message or you have an email fax linked to Microsoft 365 or Office 365. DELETE these messages, do not click on the links provided and NEVER enter your email address and password if prompted. These phishing scammers are making the site look like a legitimate Microsoft sign in pages but they are NOT. These Phishing emails are trying to steal your Microsoft Office log in. No one will legitimately send you a message or email where you have to click on a link and enter your log in details.

Regards,
