Fake E-Transfer SMS (Text) Message

2022-10-28 - Don Guilbeault - Comments (0) - General

Just to let you know. TELUS is getting bombarded with a new Phishing Scam via SMS (Text) message.

The conversation starts by initiating with:

“Hi, I sent your etransfer”

This will end up starting a dialog to lead you to downloading something or clicking a link to accept the etransfer that will end up compromising the security of your device.

Please ignore these messages, do not respond and delete the SMS(Text) Message.
